# Local Reliable Waste Collection

WASTE SOLUTIONS N.I.

## About Us

Waste Solutions N.I. are a local and dedicated Waste Management company. Based in Derry-Londonderry operating throughout the northwest we provide waste collection services to meet the needs of you and your business.

With over 30 years of experience we have worked hard to develop a reputation of being honest and transparent. We work with our clients and their businesses to minimize their waste output and increase recycling levels whilst keeping them compliant with current and ever-changing waste legislation.

We operate a waste collection network alongside unrivalled processing facilities giving us the ability to handle your various waste streams. All facilities used in the process of handling and recycling your waste is fully licensed and regularly audited, giving you the reassurance that any of your waste that we handle is being dealt with ethically and responsibly.

# What we collect & How we recycle it

## General Waste

Not all waste can be recycled but it can still be diverted from landfill, most of our general waste that we collected, we convert into (RDF) Refuse Derived Fuel and then burned to generate electricity at purpose-built waste to energy facilities.

## Mixed Recyclables

From plastic bottles to paper and aluminium cans are just some of the items that you can place in your recycling bin of which we separate and all turn into new products.

## Cardboard

We have developed relationships with leading paper mills across the UK allowing us to turn your cardboard into recycled products such as paper, kitchen roll and chip board.

## Glass

Your glass is taken to a treatment facility where it is washed, crushed and then melted down and moulded into new glass products, such as glass bottles and jars.

## Food Waste

We convert food waste into renewable resources such as electricity and natural green biogas. As of April 2017, by law any business producing more than 5kg of food waste per week must segregate their food waste and present it for collection by a licensed waste operator. If this applies to you, we have a regular collection solution.
